Ingredients: Sweet potato purée*, Water, Pear purée*, Hydrolyzed pea protein*, Brown rice*, Extra virgin olive oil*, Rice protein concentrate*, Canola oil*, Blueberry purée*, Kale purée*, Cinnamon*, Salt, Ginger*, L-carnitine, Taurine, **Vitamins** (vitamin A palmitate, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, ascorbic acid, thiamine hydrochloride, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin, choline bitartrate), **Minerals** (sodium citrate, tricalcium phosphate, magnesium chloride, ferrous sulphate, zinc sulphate, copper sulphate, potassium iodide, sodium selenate, chromium trichloride), Ascorbic acid.

*Organic.

ISOSOURCE® FIBRE 1.0 HP

The Isosource® family of products offers an extensive line of whole-protein, nutritionally complete formulas.

Isosource® Fibre 1.0 HP is a 1.0 Cal/ml, high protein formula with 25% of calories from protein. This formula also contains IS50™, a unique blend of soluble and insoluble fibres. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Standard, whole-protein tube feeding needs
- Increased protein requirements
- Recovery from illness, surgery, and burns
- Pressure ulcers
- Bowel function

FEATURES AT-A-GLANCE:

Caloric density	1.0 Cal/ml
Protein	25%
Carbohydrate	45%
Fat	30%
Protein Source	soy protein isolate, modified milk ingredients
Carbohydrate Source	corn syrup, corn maltodextrin
Fat Source	canola oil, MCT (coconut and/or palm kernel oil)
Dietary Fibre	15.2 g/1000 ml
Fibre Source	50% pea fibre and 50% oligofructose, inulin, and acacia gum
n6:n3 ratio	2.4:1
MCT:LCT	20:80
Water content	840 ml/1000 ml
Osmolality	300 mOsm/kg water
Kosher	Y
Gluten Free	Y
Lactose Free	Y (not for individuals with galactosemia)
Low Residue	N
Meets DRI for 25 micronutrients	1500 ml (see page 117)

Ingredients: Water, Corn syrup, Modified milk ingredients, Medium chain triglycerides (from coconut and/or palm kernel oil), Canola oil, Soy protein isolate, Corn maltodextrin, Taurine, L-carnitine, **Vitamins** (vitamin A palmitate, beta-carotene, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, sodium ascorbate, thiamine hydrochloride, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin, choline chloride), **Minerals** (sodium citrate, potassium citrate, potassium chloride, tricalcium phosphate, calcium citrate, trimagnesium phosphate, magnesium oxide, ferrous sulphate, zinc sulphate, manganese sulphate, copper sulphate, potassium iodide, sodium selenite, sodium molybdate, chromium trichloride), Soy lecithin, Dimethylpolysiloxane.

Contains: Milk, Soy.

MEDIUM CHAIN TRIGLYCERIDES (MCT OIL)

MCT Oil is a modular Medium Chain Triglyceride (MCT) source for patients who poorly digest or absorb conventional fats.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Defect in the intraluminal hydrolysis of fat (decreased pancreatic lipase, decreased bile salts)
- Defective mucosal fat absorption (decreased mucosal permeability, decreased absorptive surface)
- Defective lymphatic transport of fat (i.e. intestinal lymphatic obstruction)
- Ketogenic Diet

FEATURES AT-A-GLANCE:

NOVASOURCE® RENAL

With
SpikeRight®
PLUS
Port & Safety System

Novasource® Renal is a delicious, 2.0 Cal/ml formula with 22 g of protein per 237 ml serving and lower potassium and phosphorus levels for patients with renal impairment. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Acute renal failure
- Chronic renal failure
- Electrolyte restriction
- Fluid restriction

Ingredients: Water, Corn syrup, Canola oil, Modified milk ingredients, Soy protein isolate, Sugar, Salt, L-carnitine, Taurine, **Vitamins** (vitamin A palmitate, beta-carotene, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, ascorbic acid, thiamine hydrochloride, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin), **Minerals** (potassium citrate, potassium hydrate, potassium chloride, choline chloride, calcium carbonate, magnesium oxide, ferrous sulphate, zinc sulphate, manganese sulphate, copper gluconate, potassium iodide, sodium selenite, sodium molybdate, chromium trichloride), Natural and artificial flavour, Soy lecithin, Cellulose gel and gum, Citric acid, Dimethylpolysiloxane.

Contains: Milk, Soy.

OPTIFAST® 900

Optifast® is a comprehensive, evidence-based medically supervised weight management program that combines a nutritionally complete meal replacement with behavioural modification.

Meal replacement for weight reduction. For oral use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Weight reduction in obesity
- Weight reduction prior to bariatric surgery

FEATURES AT-A-GLANCE:

Caloric density	0.7 Cal/ml
Protein	40%
Carbohydrate	30%

** Each 54 g packet mixed with 300 ml of water yields 340 ml of prepared formula.

Ingredients: Milk protein, Whey protein isolate, Maltodextrin, Canola oil, Acacia gum, Oligofructose, Inulin, Salt, **Vitamins** (vitamin A palmitate, vitamin D₃, DL-alpha-tocopheryl acetate, ascorbic acid, thiamine hydrochloride, riboflavin, niacinamide, calcium d-pantothenate, pyridoxine hydrochloride, biotin, folic acid, choline bitartrate), **Minerals** (sodium citrate, potassium citrate, dipotassium phosphate, potassium chloride, magnesium oxide, ferrous sulphate, zinc sulphate, manganese sulphate, copper gluconate, potassium iodide, sodium selenite, sodium molybdate, chromium trichloride), Xanthan gum, Natural and artificial flavour, Sucralose, Stevia extract.

Contains: Milk.

PEPTAMEN® 1.0

The Peptamen® family of products is designed for absorption and tolerance, and is supported by 25+ years of clinical experience and evidence.

Peptamen® 1.0 is a 1.0 Cal/ml, peptide-based 100% whey protein, 70% MCT formula that supports feeding tolerance. For tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- GI impairment:
 - Malabsorption
 - Delayed gastric emptying
 - Diarrhea
 - Short-bowel syndrome
 - Cystic fibrosis
 - Pancreatitis
- Early enteral feeding
- Transition from or dual feeding with TPN

FEATURES AT-A-GLANCE:

Caloric density	1.0 Cal/ml
Protein	16%
Carbohydrate	50%
Fat	34%
Protein Source	partially hydrolyzed whey protein (milk)
Carbohydrate Source	corn maltodextrin, corn starch
Fat Source	MCT (coconut and/or palm kernel oil), soybean oil
n6:n3 ratio	7.4:1
MCT:LCT	70:30
Water content	850 ml/1000 ml
Osmolality	270 mOsm/kg water - unflavoured
Kosher	Y
Gluten Free	Y
Lactose	<0.5 g/100 ml (not for individuals with galactosemia)

PEPTAMEN® INTENSE 1.0 HP

The Peptamen® family of products is designed for absorption and tolerance, and is supported by 25+ years of clinical experience and evidence.

With
SpikeRight®
PLUS
Port & Safety System

Peptamen® Intense 1.0 HP is a 1.0 Cal/ml, very high protein, peptide-based, 100% whey protein, 50% MCT formula that supports feeding tolerance. With 37% of calories from protein, Peptamen® Intense 1.0 HP is formulated to help meet protein needs of patients with elevated requirements. Includes Prebio®, a unique blend of dietary fibres, in addition to EPA and DHA. For tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Acutely ill patients
- Critically ill obese patients
- Sarcopenia/muscle protein wasting
- Elevated protein needs
- Inflammatory conditions
- Stress-induced hyperglycemia
- Modified carbohydrate requirements
- GI impairment
- Diarrhea
- Early enteral feeding
- Transition from or dual feeding with TPN

Ingredients: Water, Partially hydrolyzed whey protein (from milk), Corn maltodextrin, Medium chain triglycerides (from coconut and/or palm kernel oil), Corn starch, Fish oil (from anchovy, sardine), Oligofructose, Safflower oil, Soybean oil, Inulin, Salt, Taurine, L-carnitine, **Vitamins** (vitamin A palmitate, beta-carotene, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, sodium ascorbate, thiamine mononitrate, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin, choline chloride), **Minerals** (sodium phosphate, sodium citrate, potassium phosphate, tricalcium phosphate, calcium chloride, magnesium chloride, ferrous sulphate, zinc sulphate, manganese sulphate, copper sulphate, potassium iodide, sodium selenate, sodium molybdate, chromium trichloride), Soy lecithin, Guar gum, Protease, Citric acid.

Contains: Milk, Anchovy, Sardine, Soy.

RESOURCE® DIABETIC 1.05

Resource® family of products offers a wide range of solutions specifically formulated for individuals with special nutritional requirements.

Resource® Diabetic 1.05 is a high protein formula with 24% of calories from protein suitable for people with diabetes. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Diabetes
- Impaired glucose tolerance
- Stress-induced hyperglycemia
- Modified carbohydrate requirements
- Increased protein requirements

FEATURES AT-A-GLANCE:

Caloric density	1.05 Cal/ml
Protein	24%
Carbohydrate	36%
Fat	40%
Protein Source	sodium and calcium caseinates (milk), soy protein isolate
Carbohydrate Source	corn syrup, fructose
Fat Source	high oleic sunflower oil, soybean oil
Dietary Fibre	12 g/1000 ml
Fibre Source	100% soy fibre
n6:n3 ratio	10.7:1
Water content	842 ml/1000 ml
Osmolality	450 mOsm/kg water
Kosher	Y
Gluten Free	Y
Lactose Free	Y (not for individuals with galactosemia)
Low Residue	N
Meets DRI for 25 micronutrients	1300 ml (see page 117)

Contains: Milk, Soy.

RESOURCE® 2.0

Resource® family of products offers a wide range of solutions specifically formulated for individuals with special nutritional requirements.

Resource® 2.0 is a calorie dense, 2.0 Cal/ml, high protein, complete nutrition formula. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Fluid restriction/volume intolerance
- Elevated calorie and protein needs
- Patients at risk for, or with pressure ulcers
- Patients prescribed a Medication Pass Program

FEATURES AT-A-GLANCE:

Ingredients*: Water, Corn syrup, Modified milk ingredients, Canola oil, Sugar, Salt, **Vitamins** (vitamin A palmitate, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, sodium ascorbate, thiamine mononitrate, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin, choline chloride), **Minerals** (sodium citrate, potassium phosphate, potassium citrate, tricalcium phosphate, magnesium chloride, magnesium oxide, ferrous sulphate, zinc sulphate, manganese sulphate, copper sulphate, potassium iodide, sodium selenate, sodium molybdate, chromium trichloride), Soy monoglycerides, Soy lecithin, Cellulose gel and gum, Citric acid, Natural and artificial flavour, Dimethylpolysiloxane.

Contains: Milk, Soy.

THICKENUP® CLEAR

The ThickenUp® family of products includes powder thickeners for preparing texture modified food and beverages for the nutritional management of people living with dysphagia.

ThickenUp® Clear is a xanthan-based powdered thickener that remains clear, lump-free, tasteless, odourless, and maintains consistency over time once the desired thickness is reached. ThickenUp® Clear is clinically demonstrated to improve swallowing safety¹. ThickenUp® Clear is the #1 recommended brand of thickener for patients with dysphagia by Canadian dietitians² and suitable for use with the IDDSI framework (International Dysphagia Diet Standardisation Initiative).

FOR THE NUTRITIONAL MANAGEMENT OF:

- Dysphagia

FEATURES AT-A-GLANCE:

Not a significant source of saturated fat, trans fat, fibre, sugars, cholesterol, calcium or iron.

* 1 scoop or stick pack

Ingredients: Corn and potato maltodextrin, Xanthan gum, Potassium chloride.

This product is only suitable for individuals greater than 3 years old.

Nestlé Health Science recommends using ThickenUp® Clear powder in the canister within two months of opening.

To maintain product quality, ship and store unopened package at room temperature (max. 25°C).

Once opened, store in a cool, dry place. After each use, re-seal the canister and tightly re-seal the plastic bag inside the bulk pail and cover with lid; sanitize lid before re-use.

Follow sanitary techniques for preparation which includes having clean, appropriate work areas, adequate hand washing and clean equipment during preparation and use.

Ingredients: Modified corn starch.

This product is only suitable for individuals greater than 3 years old.

Nestlé Health Science recommends using ThickenUp® Original powder in the canister within one month of opening. For the ThickenUp® Original bulk format, use within 2 months once opened.

To maintain product quality, ship and store unopened package at room temperature (max. 25°C).

Once opened, store in a cool, dry place. After each use, re-seal the canister and tightly re-seal the plastic bag inside the bulk case.

Follow sanitary techniques for preparation which includes having clean, appropriate work areas, adequate hand washing and clean equipment during preparation and use.

TOLEREX®

The Tolerex® and Vivonex® family of elemental diets require minimal digestive functionality while providing the benefits associated with continued use of the GI tract.

Tolerex® is a powdered, nutritionally complete, elemental formula with 100% free amino acids providing 1.0 Cal/ml, with 8.2% protein equivalent and 1.7% calories from fat for the severely compromised GI tract. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Severely impaired GI function
 - Severe protein and fat malabsorption
 - TPN alternative
 - Transition from TPN
 - Dual feeding with TPN

FEATURES AT-A-GLANCE:

Caloric density	1.0 Cal/ml (at standard dilution)
Protein	8.2%

ALFAMINO® JUNIOR IS A SUGGESTED REPLACEMENT FOR VIVONEX® PEDIATRIC, WHICH HAS BEEN DISCONTINUED.

ALFAMINO® JUNIOR

Alfamino® Junior is 1.0 Cal/mL at standard dilution. It is a hypoallergenic formula for the dietary management of cow's milk allergy and contains 100% free amino acids.

Alfamino® Junior is a nutritionally complete powdered formula. Contains 65% of fat as medium chain triglycerides (MCT). Suitable for children ages 1 to 13 years. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Cow's milk allergy
- Eosinophilic esophagitis
- Impaired gastrointestinal (GI) function
- Transition from PN (parenteral nutrition)
- Short bowel syndrome
- Multiple food allergies
- Malabsorption syndrome

COMPLEAT® JUNIOR 1.0

The Compleat® family of products offers unique, nutritionally complete tube feeding formulas with ingredients from real food.

Compleat® Junior 1.0 is a 1.0 Cal/ml complete nutrition formula that contains real food ingredients and has no artificial colours, flavours or sweeteners. This formula contains a blend of fibre and protein sources and does not contain corn or soy. Suitable for children ages 1 to 13 years. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Convenient alternative to homemade tube feeding
- Growth failure
- Short or long-term tube feeding regimens
- Base for home blenderized tube feeding

FEATURES AT-A-GLANCE:

Caloric density	1.0 Cal/ml
Protein	15%
Carbohydrate	51%
Fat	34%
Protein Source	dried chicken meat, milk protein, pea protein isolate
Carbohydrate Source	brown rice syrup, fruit and vegetable ingredient blend including: dried green peas, tomato paste, peach purée concentrate, dried green beans, dried carrots, cranberry juice concentrate
Fat Source	canola oil, MCT (coconut and/or palm kernel oil)
Dietary Fibre	8.0 g/1000 ml
Fibre Source	24% acacia gum, oligofructose, inulin; 76% vegetable fibre
n6:n3 ratio	3.7:1
MCT:LCT	20:80
Water content	850 ml/1000 ml
Osmolality	400 mOsm/kg water
Kosher	N
Gluten Free	Y
Lactose	<0.5 g/100 ml (not for patients with galactosemia)
Low Residue	N
Meets DRI for	1000 ml (1-8 years)
25 micronutrients	1500 ml (9-13 years)
(see page 117)

Taurine	mg	8	20
L-carnitine	mg	4	10

Ingredients: Water, Corn maltodextrin, Modified milk ingredients, Soybean oil, Sugar, Canola oil, Medium chain triglycerides (from coconut and/or palm kernel oils), Pea hull fibre, Oligofructose, Inulin, Salt, Taurine, L-carnitine, **Vitamins** (vitamin A palmitate, beta-carotene, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, sodium ascorbate, thiamine mononitrate, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, inositol, folic acid, cyanocobalamin, choline chloride), **Minerals** (sodium phosphate, dipotassium phosphate, potassium chloride, calcium citrate, dimagnesium phosphate, ferrous sulphate, zinc sulphate, manganese sulphate, copper sulphate, potassium iodide, sodium selenate, sodium molybdate, chromium trichloride), Soy lecithin, Potassium hydrate, Artificial flavour, Carrageenan, Stevia extract, Dimethylpolysiloxane.

Contains: Milk, Soy.

PEPTAMEN® JUNIOR 1.0

The Peptamen® family of products is designed for tolerance and is supported by 25+ years of clinical experience and evidence.

Peptamen® Junior 1.0 is formulated to meet the nutritional needs of children 1-13 years. Peptamen® Junior 1.0 is a 1.0 Cal/ml formula, with a peptide based, 100% whey protein designed for enhanced digestion and protein absorption and 60% MCT designed for enhanced lipid absorption to support feeding tolerance. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- **GI impairment:**
 - Malabsorption
 - Delayed gastric emptying
 - Diarrhea
 - Short-bowel syndrome
 - Cystic fibrosis
 - Radiation enteritis
- Early enteral feeding
- Transition from oral to dual feeding with TPN

FEATURES AT-A-GLANCE:

Caloric density	1.0 Cal/ml
Protein	12%
Carbohydrate	55%
Fat	33%
Protein Source	partially hydrolyzed whey protein (milk)
Carbohydrate Source	corn maltodextrin, sugar, corn starch
Fat Source	MCT (coconut and palm kernel oil), soybean oil, canola oil
n6:n3 ratio	4.8:1
MCT:LCT	60:40
Sucralose	40 mg/1000 ml
Water content	850 ml/1000 ml
Osmolality	360 mOsm/kg water
Kosher	Y
Gluten Free	Y
Lactose	<0.5 g/100 ml (not for patients with galactosemia)
Low Residue	Y
Meets DRI for	1000 ml (1-8 years)
25 micronutrients (see page 117)	1500 ml (9-13 years)

Ingredients: Water, Corn maltodextrin, Partially hydrolyzed whey protein (from milk), Medium chain triglycerides (from coconut and/or palm kernel oils), Sugar, Corn starch, Soybean oil, Canola oil, Monk fruit juice concentrate, Salt, Taurine, L-carnitine, **Vitamins** (vitamin A palmitate, beta-carotene, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, sodium ascorbate, thiamine mononitrate, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin, choline chloride, inositol), **Minerals** (sodium phosphate, sodium citrate, potassium phosphate, potassium citrate, potassium chloride, tricalcium phosphate, calcium citrate, magnesium chloride, magnesium oxide, ferrous sulphate, zinc sulphate, manganese sulphate, copper sulphate, potassium iodide, sodium selenate, chromium trichloride), Soy lecithin, Guar gum, Flavour, Protease, Sucralose, Citric acid.

Contains: Milk, Soy.

PEPTAMEN® JUNIOR 1.5

The Peptamen® family of products is designed for tolerance and is supported by 25+ years of clinical experience and evidence.

Peptamen® Junior 1.5 is formulated to meet the nutritional needs of children 1-13 years. Peptamen® Junior 1.5 is a 1.5 Cal/ml formula for elevated energy needs or volume sensitivities. It includes a peptide based, 100% whey protein for enhanced digestion and protein absorption, 60% MCT for enhanced lipid absorption, with EPA, DHA and PHGG. PHGG is known to be a well tolerated soluble fibre. For tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- GI impairment:
 - Malabsorption
 - Delayed gastric emptying
 - Diarrhea
 - Short-bowel syndrome
 - Cystic fibrosis
 - Radiation enteritis
- Early enteral feeding
- Transition from or dual feeding with TPN
- Volume restrictions
- Increased energy needs

FEATURES AT-A-GLANCE:

Caloric density	1.5 Cal/ml
Protein	12%
Carbohydrate	49%
Fat	39%
Protein Source	partially hydrolyzed whey protein (milk)
Carbohydrate Source	corn maltodextrin, corn starch
Fat Source	MCT (coconut and palm kernel oil), soybean oil, canola oil, fish oil (anchovy, sardine)
Dietary Fibre	6 g/1000 ml
Fibre Source	Partially Hydrolyzed Guar Gum
n6:n3 ratio	5.4:1
MCT:LCT	60:40
Omega-3 Fatty acids	650 mg EPA & DHA/1000 ml
Water content	772 ml/1000 ml
Osmolality	430 mOsm/kg water
Kosher	Y
Gluten Free	Y
Lactose	<0.5 g/100 ml (not for patients with galactosemia)
Low Residue	N
Meets DRI for	750 ml (1-8 years)
25 micronutrients	1000 ml (9-13 years)
(see page 117)

Contains: Milk, Soy, Anchovy, Sardine.

RESOURCE® KID ESSENTIALS 1.5

The Resource® family of products offers a wide range of solutions specifically formulated for individuals with special nutritional requirements.

Resource® Kid Essentials 1.5 is formulated to meet the nutritional needs of children 1-13 years. It is a 1.5 Cal/ml, whole-protein formula in vanilla flavour delivering more calories in less volume than standard 1.0 Cal/ml formulas. For oral and tube feeding use.

FOR THE NUTRITIONAL MANAGEMENT OF:

- Growth failure
- Volume restrictions
- Inadequate oral intake
- Increased energy needs

FEATURES AT-A-GLANCE:

Caloric density	1.5 Cal/ml
Protein	11%
Carbohydrate	44%
Fat	45%
Protein Source	sodium and calcium caseinates (milk), whey protein concentrate
Carbohydrate Source	maltodextrin, sugar
Fat Source	soybean oil, high oleic sunflower oil, MCT (coconut and/or palm kernel oil)
Dietary Fibre	9.28 g/1000 ml
Fibre Source	77 % partially hydrolyzed guar gum and 23% soy fibre
n6:n3 ratio	6.9:1

* Contains 0.5 g of soy fibre & 1.7 g of partially hydrolysed guar gum per 237 ml

** 36% as Beta-Carotene

Ingredients: Water, Corn maltodextrin, Vegetable oils (soybean, high oleic sunflower), Modified milk ingredients, Sugar, Partially hydrolyzed guar gum, Medium chain triglycerides (from coconut and/or palm kernel oil), Ground soy cotyledon fibre, Salt, Taurine, L-carnitine, **Vitamins** (vitamin A palmitate, beta-carotene, vitamin D₃, DL-alpha-tocopheryl acetate, vitamin K₁, ascorbic acid, thiamine hydrochloride, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, biotin, folic acid, cyanocobalamin, choline chloride, inositol), **Minerals** (potassium citrate, potassium chloride, tricalcium phosphate, trimagnesium phosphate, ferrous sulphate, zinc sulphate, manganese sulphate, copper gluconate, potassium iodide, sodium selenite, chromium trichloride, sodium molybdate), Artificial flavour, Soy lecithin, Potassium hydrate, Carrageenan, Dimethylpolysiloxane.

Contains: Milk, Soy.

ALWAYS REFER TO THE PRODUCT LABEL FOR THE MOST CURRENT NUTRITION INFORMATION. 101

GENERAL INFORMATION

EXPIRATION DATES

Nestlé Health Science is committed to offering the highest quality products to those with special nutritional needs. In order to assure this quality, Nestlé Health Science products carry an expiration date.

The expiration date is the date up to which the product maintains its quality as well as the nutrient content declared on the label. The product should not be consumed after the expiration date has passed.

The expiration date is bilingual and is indicated by EXP followed by the date in a 4 digit year, abbreviated 2 digit month, and 2 digit day format.

The following are the Canadian bilingual month abbreviations used for Nestlé expiration date coding.

January: **JA** April: **AL** July: **JL** October: **OC**

February: **FE** May: **MA** August: **AU** November: **NO**

March: **MR** June: **JN** September: **SE** December: **DE**

STORAGE

The following instructions are regarded as generally applicable to all Nestlé Health Science products in this guide. However, for product-specific instructions always refer to the label.

LIQUID FORMULA

TETRA PRISMA®

Once the formula is opened, portion into an appropriate serving/feeding container and use immediately. Tightly cover package and refrigerate any unused portion. Discard opened-refrigerated formula within the time stated on the label. In order not to compromise product quality and safety, refrigeration temperature must be between 2-4°C.

ULTRAPAK®

Spiked UltraPak® liquid formulas are hung at room temperature. It is not necessary to store the spiked UltraPaks® in the fridge between intermittent feeds.

POWDERED FORMULA

Store powdered products in a cool, dry place and protect from moisture. For multi-serve/bulk packages; once opened, use within the time stated on the label.

HANG TIME

GENERAL GUIDELINES

Clean handling techniques must be employed in the preparation of all feedings. These include having clean, appropriate work areas; adequate clean and/or sterilized equipment; and minimal handling and manipulation of formulas during preparation and use. Any contamination during preparation or delivery reduces the hang time of the formula. Re-use of feeding containers and delivery sets increases the likelihood of contamination.

CLOSED SYSTEM - ULTRAPAK® WITH SPIKERIGHT® PLUS PORT

The UltraPak® with SpikeRight® PLUS enteral closed system is a pre-filled, commercially sterile, non-air dependent container that may hang for **up to 48 hours at room temperature** once spiked with an appropriate administration set.

OPEN SYSTEM - POWDERS OR TETRA PRISMA® CONTAINERS

An open system encompasses reconstituted powders or ready-to-use liquids decanted from a preparation container or original packaging into a feeding container.

The A.S.P.E.N. Safe Practices for Enteral Nutrition Therapy* publication provides the following hang times recommendations:

- Limit infusion time for open enteral nutrition feeding systems to 4-8 hours maximum (12 hours in the home setting)
- Limit infusion time for a reconstituted powder product or modular to 4 hours maximum.

These hang time recommendations assume the formula is kept at room temperature and is subject to minimal handling and manipulation. The microbial safety of all tube feeding formulas is dependent on clean handling and administrative techniques.

While literature states a wide range of actual hang time recommendations, most agree that administration sets and bags used in an open system should be changed every 24 hours. This information also indicates that the bag and administration set should be flushed with water before adding additional formula.

*Boullatta JI et al. ASPEN Safe Practices for Enteral Nutrition Therapy. JPEN. 2017 Jan;41(1):15-103

GOOD TO KNOW

LACTOSE

Lactose is a disaccharide sugar (galactose and glucose) that is found in milk.

Although Health Canada does not have a specific, quantified limit for lactose-free, the Canadian Food Inspection Agency (CFIA) uses the guideline: **Lactose-free** means that there is no detectable lactose in the food using an acceptable laboratory method. Nestlé adheres to this guideline.

Due to great variation in individual lactose tolerances, a single threshold of lactose for all lactose intolerant people has not been determined. Symptoms of lactose intolerance have been described after intakes of less than 6 g per serving in some people, while the vast majority of lactose maldigesters can tolerate up to 12 g of lactose as a single dose with no or minor symptoms¹.

Where low levels of lactose are detected in Nestlé Health Science oral and enteral products, a statement of “<0.5 g lactose per serving” or “<0.5 g lactose per 100 ml” is made.

All Nestlé Health Science products have been tested to validate if they are lactose-free. Information in this guide is current at the time of printing.

Accurate and up-to-date information can be found on all Nestlé Health Science product labels. Products containing a milk ingredient and labelled as lactose-free are also labelled “not for individuals with Galactosemia.”

GLUTEN

Gluten is a protein composite (of gliadin and glutenin) found in wheat and related grain species, including but not limited to; barley, rye, oats, spelt, durum, kamut, emmer and triticale.

Health Canada views **gluten-free** products to contain less than 20 parts per million (ppm) of incidental gluten.

All Nestlé Health Science products have been tested to validate if they are gluten-free. Information in this guide is current at the time of printing. Accurate and up-to-date information can be found on all Nestlé Health Science product labels.

FIBRE

Nestlé Health Science products contain a variety of insoluble (soy fibre, pea hull fibre, from fruits and vegetables) and soluble dietary fibres (inulin, oligofructose, acacia gum, partially hydrolyzed guar gum and Prebio[®]: a blend of oligofructose and inulin). Sources of dietary fibre in each formula are listed in the Features At-A-Glance section on each product page.

KOSHER

Nestlé Health Science products that are certified kosher display the appropriate kosher symbol  or  on their labels. Products containing dairy ingredients or produced on dairy equipment will have a “D” following the kosher symbol. All kosher-certified products are manufactured under the Rabbinical supervision of the Kashruth Division of the Orthodox Union.

HALAL

Nestlé Health Science products that are certified Halal display the statement “Halal Certified” on the label. All halal-certified products are manufactured under the supervision of Halal Certification Services GmbH to ensure they are halal according to the Islamic Jurisdiction.

For more information, [click here](#).

1. EFSA Journal 2010;8(9):1777.

GOOD TO REMEMBER

- Nestlé Health Science products are not for parenteral use.
- For oral use, portion formula into an appropriate serving container. Re-use of serving containers or consuming directly from product packaging is not recommended as it may compromise the food safety and quality of the product.
- Use under medical supervision. While many Nestlé Health Science products are designed to meet specific needs of patients with certain conditions, the choice of the optimal product for a patient must be based on patient-specific information and clinical judgment.
- Never use a microwave oven to warm formula. Serious burns can result.
- Adult nutritional products are not intended for use in children unless recommended by a physician or qualified health care professional.
- Always follow label instructions for proper preparation and serving. Nestlé Health Science does not recommend any alternate storage or preparation of products.
- For safety, always inspect product packaging prior to serving or use to ensure all safety seals are in tact.

Nestlé Health Science products are available throughout Ontario at any Pharmacy.

NUTRITION PRODUCTS

The Ontario Drug Benefit covers the cost of these products up to a maximum dollar amount.

PATIENT ELIGIBILITY CRITERIA FOR COVERAGE OF NUTRITION PRODUCTS

The following patient eligibility criteria will determine a recipient's eligibility for coverage of Nutrition Products (NPs) under the Ontario Drug Benefit (ODB) program.

Nutrition Products will be reimbursed for ODB eligible persons when prescribed by a physician as the patient's

sole source of nutrition and meet one of the following:

- oropharyngeal or gastrointestinal disorders resulting in esophageal dysfunction or dysphagia; e.g. head and neck surgery, neuromuscular disorder, or cerebral vascular disease where dysphagia prevents eating;
- maldigestion or malabsorption disorder and/or significant gut failure where food is not tolerated; e.g. pancreatic insufficiency, biliary obstruction, short bowel syndrome;
- for patients requiring the use of a chemically defined diet as a primary treatment of a disease where the therapeutic benefit has been demonstrated; i.e. Crohn's Disease

Each claim for reimbursement must be supported by a valid, fully completed Nutrition Product form.

Pharmacists are required to retain a copy of the Nutrition Product form on file for a period of two years.

Exclusions

A nutrition product will not be reimbursed under the ODB program if it is intended for one of the following uses:

- prescribed weight loss in the treatment of obesity
- food allergies
- body building
- voluntary meal replacement
- nutritional supplement
- convenience
- used as a replacement for breast feeding for infants with normal gastrointestinal absorptive function

Patients tolerating some solid foods and requiring only supplementation in addition to food are not eligible for coverage.

QUÉBEC REIMBURSEMENT LIST

Nestlé Health Science products are available at any pharmacy and through some medical distributors. For more information [click here](#).

RAMQ REIMBURSEMENT CRITERIA

NUTRITIONAL FORMULA

SEMI-ELEMENTAL and MONOMERIC (VA98)

- for enteral feeding.
- for oral feeding in persons requiring monomeric nutritional formulas or semi-elemental nutritional formulas as their source of nutrition in the presence of severe maldigestion or malabsorption disorders and for whom polymeric formulas are not recommended or not tolerated.
- for children suffering from malnutrition, malabsorption or growth failure related to a medical condition.
- for persons suffering from cystic fibrosis.

SEMI ELEMENTAL, VERY HIGH PROTEIN - PEPTAMEN[®] INTENSE HIGH PROTEIN

- for enteral feeding of persons requiring semi-elemental nutritional formulas as their source of nutrition in the presence of malabsorption, and whose nutritional needs in proteins have significantly increased.

POLYMERIC WITH RESIDUE OR LOW-RESIDUE

- for enteral feeding.
- for total oral feeding of persons requiring nutritional formulas as their source of nutrition in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption.
- for children suffering from malnutrition, malabsorption or growth failure related to a medical condition.
- for persons suffering from cystic fibrosis.

POLYMERIC WITH RESIDUE - INTOLERANCE OR ALLERGY - COMPLEAT[®] 1.5, COMPLEAT[®] JUNIOR 1.5

For persons with a major intolerance or allergy to milk or soy proteins present in the polymeric nutritional formulas with residue appearing on the List of Medications and who meet at least one of the criteria under **POLYMERIC WITH RESIDUE OR LOW RESIDUE** (as outlined above).

PROTEIN - BENEPROTEIN[®]

To increase the protein content of other nutritional formulas.

POLYMERIC LOW-RESIDUE - SPECIFIC USE - MODULEN[®]

For total feeding, whether enteral or oral, of children suffering from Crohn's disease.

SKIM MILK/COCONUT OIL - MCT OIL (VA5)

For persons unable to effectively digest or absorb long-chain fatty foods.

SASKATCHEWAN AIDS TO INDEPENDENT LIVING (SAIL)

The following Nestlé Health Science products are listed for reimbursement on the: [SASKATCHEWAN AIDS TO INDEPENDENT LIVING](#).

DIETARY REFERENCE INTAKES (DRIS)

Dietary Reference Intakes (DRIs) are a comprehensive set of nutrient reference values for healthy populations that can be used for assessing and planning diets. The DRIs reflect the current state of scientific knowledge with respect to nutrient requirements and are published as a series of reports by the U.S. National Academies.

There are 22 life stage and gender groups in the DRIs. When comparing the DRIs to the Nestle Health Science adult and pediatric tube feeding formulas, the following groups were used:

- **Pediatrics:** children ages 1-8 years and 9-13 years.
- **Adults:** males 31-50 years. This group has the highest nutrient needs among adults with the exception of B6 (51+ years); vitamin D (71+ years); calcium (males 70+ years; females 51+ years); and iron (females up to 50 years).

For more information on the DRIs [click here](#).
